For all aspects of semiconductor manufacturing, testing and inspection are necessary to yield high-quality products. In Chapter 3, therefore, various process monitoring methods, including those that focus on product wafers and those that focus on the equipment used to produce those wafers, are discussed in detail.

Physics for the year 2000 has been awarded to two semiconductor physicists, Zhores I. Alferov and Herbert Kroemer (â€œfor developing semiconductor heterostructures used in high-speed- and opto-electronicsâ€•) and a semiconductor device engineer, Jack S. Kilby (â€œfor his part in the invention of the integrated circuitâ€•).
