

implementing domain specific languages pdf

A domain-specific language (DSL) is a computer language specialized to a particular application domain. This is in contrast to a general-purpose language (GPL), which is broadly applicable across domains. There are a wide variety of DSLs, ranging from widely used languages for common domains, such as HTML for web pages, down to languages used by only one or a few pieces of software, such as ...

Dialects and domain-specific lingo helps people to communicate specifically and effectively. MPS brings the same flexibility into the world of programming languages. Unlike traditional programming languages with strict syntax and semantics, MPS allows a language to be created, altered or extended by ...

How Does MPS Work? - Concepts | MPS by JetBrains

Domain-driven design (DDD) is an approach to software development for complex needs by connecting the implementation to an evolving model. The premise of domain-driven design is the following: placing the project's primary focus on the core domain and domain logic;; basing complex designs on a model of the domain;
