

introduction to pharmaceuticals ashok pdf

An excipient is a substance formulated alongside the active ingredient of a medication, included for the purpose of long-term stabilization, bulking up solid formulations that contain potent active ingredients in small amounts (thus often referred to as "bulking agents", "fillers", or "dilutents"), or to confer a therapeutic enhancement on the active ingredient in the final dosage form, such as ...

Two organolead halide perovskite nanocrystals, $\text{CH}_3\text{NH}_3\text{PbBr}_3$ and $\text{CH}_3\text{NH}_3\text{PbI}_3$, were found to efficiently sensitize TiO_2 for visible-light conversion in photoelectrochemical cells. When self-assembled on mesoporous TiO_2 films, the nanocrystalline perovskites exhibit strong band-gap absorptions as semiconductors. The $\text{CH}_3\text{NH}_3\text{PbI}_3$ -based photocell with spectral sensitivity of up to 800 nm yielded a ...

Organometal Halide Perovskites as Visible-Light

Glass is a non-crystalline, amorphous solid that is often transparent and has widespread practical, technological, and decorative usage in, for example, window panes, tableware, and optoelectronics. The most familiar, and historically the oldest, types of manufactured glass are "silicate glasses" based on the chemical compound silica (silicon dioxide, or quartz), the primary constituent of sand.

Glass - Wikipedia

1. Introduction. Patient centric pharmaceutical drug product design may be described as "the process of identifying the comprehensive needs of individuals or the target patient population and utilizing the identified needs to design pharmaceutical drug products that provide the best overall benefit to risk profile for that target population over the intended duration of treatment ...

Patient acceptability, safety and access: A balancing act

The Columbus Instruments Oxymax Economy System is an indirect open circuit calorimeter designed to simultaneously measure metabolic performance of multiple subjects that have similar ventilation needs.
