This thesis entitled: Design and Characterization of Low Phase Noise Microwave Circuits written by Jason Breitbarth has been approved for the Department of Electrical and Computer Engineering

Design and Characterization of Low Phase Noise Microwave

Low phase noise microwave signals find use in critical technological applications such as radar, telecommunications, deep space navigation systems, timing distribution and synchronization [1] as well as in the leading edge of science such as Very Long-Baseline

Advanced noise reduction techniques for ultra-low phase

module uses a low noise 100 MHz OCXO whose maintaining circuit is designed such that the close-in phase noise of the oscillator is determined by the quartz crystal resonator [23]. The latter, a ...

Simple-design ultra-low phase noise microwave frequency

But the performance of RF/microwave frequency synthesizers is often tied to a lower-frequency reference oscillator, such as an oven-controlled crystal oscillator (OCXO), and great effort is often required to produce a microwave frequency synthesizer with low phase noise.

PHASE NOISE IN MICROWAVE OSCILLATORS AND AMPLIFIERS M.S

The common traditional method for low phase noise microwave oscillators was to use cavity and dielectric resonators.[1 ,2] These resonators have an appropriate quality factor but they are voluminous, non-planar and inconsistent with the technology of MMICs.
