This LID Design Manual for National Cooperative Highway Research Program (NCHRP) Project 25-20(01) is one of three reports of the project Evaluation of Best Management Practices and Low Impact Development for Highway Runoff Control that present results of this project, which ran between August 2002 and May 2006.

Evaluation of Best Management Practices for Highway Runoff

management information systems (MIS) departments, and information systems personnel, as well as operations, scheduling, maintenance, finance, and other management personnel concerned with improving information flow and data base development.

TCRP Synthesis 5 - Transportation Research Board

section to the Federal Aid Highway Act of 1968 that required the Secretary of the U.S. Department of Transportation to establish national bridge inspection standards. As a result, the Federal Highway Administration (FHWA) developed requirements for a program of inventory and appraisal of the nation's bridges.

Printed by authority of the State of Illinois, 0553-16, 05/16

Management information systems encompass a broad and complex topic. To make this topic more manageable, boundaries will be defined. First, because of the vast number of activities relating to management information systems, a total review is not possible. Those discussed here
