Adaptive optics (AO) is a technology used to improve the performance of optical systems by reducing the effect of incoming wavefront distortions by deforming a mirror in order to compensate for the distortion. It is used in astronomical telescopes and laser communication systems to remove the effects of atmospheric distortion, in microscopy, optical fabrication and in retinal imaging systems ...

Using the published literature and open-access internet resources we identified predictive biomarkers that are routinely used to prescribe targeted drugs for patients with solid tumors. We reviewed how each biomarker was identified from a clinical and preclinical standpoint (). The results were analyzed by a panel formed by experienced specialists in biomarker research from several fields ...
