Readers continue to turn to Klein's Organic Chemistry as a Second Language: First Semester Topics, 4th Edition because it enables them to better understand fundamental principles, solve problems, and focus on what they need to know to succeed. This edition explores the major principles in the field and explains why they are relevant. It is written in a way that clearly shows the patterns in ...

The Chemistry and Applications of Metal-Organic Frameworks

Carries water: Studies on water adsorption and transport on oxidized 2 D carbon materials have attracted increasing interest owing to their applications in various research fields such as sensing, energy conversion, and membrane separation. Herein, the recent progress on water adsorption and transport on oxidized 2 D carbon materials is reviewed, together with its application in proton ...

Fluorine is a chemical element with symbol F and atomic number 9. It is the lightest halogen and exists as a highly toxic pale yellow diatomic gas at standard conditions. As the most electronegative element, it is

extremely reactive, as it reacts with almost all other elements, except for helium and neon.. Among the elements, fluorine ranks 24th in universal abundance and 13th in terrestrial ...

Organic matter preservation is central to understanding biological potential on Mars through time. Whether it holds a record of ancient life, is the food for extant life, or has existed in the absence of life, organic matter in martian materials holds chemical clues to planetary conditions and processes.

Chemistry comes into play in the form of chemical probes or as compounds being evaluated as potential leads or drugs. The use of chemical probes to elucidate biology is the basis of chemical genomics.

American Journal of Applied Chemistry (AJAC) a peer-reviewed open access journal published bimonthly in English-language, provides rapid publication of articles in all areas of applied chemistry and its applications. The attendant goal is to promote widespread acceptance of the Journal as an authoritative and indispensable holding in academic and institutional libraries.

American Journal of Applied Chemistry :: Science

Medicinal chemistry is discipline at the intersection of chemistry, especially synthetic organic chemistry, and pharmacology and various other biological specialties, where it is involved with design, chemical synthesis and development for market of pharmaceutical agents, or bio-active molecules (drugs).

Octopus chip cell capture: Inspired by the high efficiency of the prey mechanism of the octopus, an aptamer-tailed octopus chip (AP-Octopus-Chip) for CTC enrichment was developed. The design of the chip and the high binding affinity of the multivalent structures against the target cells significantly improved the CTC capture efficiency and enrichment.
