

### **solving polynomial equations foundations pdf**

A polynomial equation, also called algebraic equation, is an equation of the form  $a_n x^n + a_{n-1} x^{n-1} + \dots + a_0 = 0$ . For example,  $x^2 + 3x + 2 = 0$  is a polynomial equation. When considering equations, the indeterminates (variables) of polynomials are also called unknowns, and the solutions are the possible values of the unknowns for which the equality is true (in general more than one solution may exist).

Évariste Galois (/ ˈɡæloʊ ˈɡalwaː /; French: [evaʁist ɡalo] ; 25 October 1811 – 31 May 1832) was a French mathematician and political activist. While still in his teens, he was able to determine a necessary and sufficient condition for a polynomial to be solvable by radicals, thereby solving a problem standing for 350 years. His work laid the foundations for Galois theory and group ...
