A clock face, or dial, is the part of an analog clock (or watch) that displays the time through the use of a fixed-numbered dial or dials and moving hands. In its most basic form, recognized throughout the world, the periphery of the dial is numbered 1 through 12 indicating the hours in a 12-hour cycle, and a short hour hand makes two revolutions in a day.

A minute of arc, arcminute (arcmin), arc minute, or minute arc is a unit of angular measurement equal to 1 /

60 of one degree. Since one degree is $1 / 360$ of a turn (or complete rotation), one minute of arc is $1 / 21\,600$ of a turn – it is for this reason that the Earth's circumference is almost exactly 21,600 nautical miles. A minute of arc is $\pi / 10\,800$ of a radian.
