Women in computing have shaped the evolution of information technology. They were among the first programmers in the early-20th century, and contributed substantially to the industry. As technology and practices altered, the role of women as programmers has changed, and the recorded history of the field has downplayed their achievements.

The relationship between women and video games has received extensive academic, corporate, and social attention. Since the 1990s, female gamers have commonly been regarded as a minority, but industry surveys have shown that in time the gender ratio has become closer to equal, and since the 2010s, women have been found to make up about half of all gamers.
